# AI Solutions for Smart Manufacturing

Manufacturers count on Modzy to power solutions for Industry 4.0.

The Challenge

Manufacturers need AI now, but IT teams struggle to integrate at scale across a range of environments. With Modzy, you can build AI solutions in weeks, not months or years. Modzy is the single platform for all your AI use cases - in the cloud, on-prem, hybrid, air gap, or edge.

Build AI Solutions Faster with Modzy

Run ML Workloads Anywhere - including at the edge

Power your AI with Modzy, a platform for integrating ML/AI for industrial IoT and edge solutions. Deploy models once, use APIs and pre-built connectors to deliver ML capability anywhere, and run at-scale to enable real-time analytics on all your assets, sensors, and more.

Features

- Fast Development
- API Integration
- Deploy Anywhere
- Infrastructure Autoscaling
- Monitoring & Governance
- Enterprise Security

Customer Case Study

Our customers rely on Modzy to build AI solutions across a wide range of use cases.
One **major U.S. industrial equipment manufacturer** is using Modzy to manage supply chain and worker safety risks.

With Modzy, this company is building smart solutions for:
- Predictive air quality monitoring
- Anticipating component part availability
- Performing equipment predictive maintenance
